About Our Company

Amertec is an Indonesian incorporated company, operating since 1994. The company offers Engineering, Procurement, and Construction (EPC) services, including Project Management and Operations & Maintenance (O&M). Amertec is committed to supporting industries and institutions across the energy value chain and industrial infrastructure sectors. We provide engineering and construction services to sectors such as energy, petrochemicals, manufacturing, and public infrastructure. Our capabilities include the design, supply, fabrication, and installation of composite-based systems and mechanical structures, including industrial piping, tanks, ducts, scrubbers, and other custom-engineered solutions. Our expertise covers a wide range of services in industrial engineering, EPC project delivery, composite technology, and mechanical integration.

Amertec is an integrated Engineering, Procurement, and Construction (EPC), Project Management, and Operations & Maintenance (O&M) company since 1994.

We utilize advanced drilling, installation, and transportation fleets to support upstream developments during preliminary assessments, exploration, and the production of conventional and unconventional reserves.

Amertec consistently provides effective solutions and services across the energy value chain and industrial sectors. It was founded with a bold vision to transform the global Oil & Gas industry from a mechanical fabricator to one of Indonesia's leading EPCIC contractors. Over the years, Amertec has consistently pursued opportunities through the unique challenges presented by our clients.

We enhance the value of our resources through specific expertise and capabilities in complex midstream and downstream infrastructures—such as gas treatment plants, compressor stations, LNG and regasification facilities, pipelines, and chemical processing systems.

Today, Amertec has successfully completed hundreds of challenging projects—achieved and delivered across multiple divisions.

We are a unique, global industrial unit operating across the full value chain of energy resources and play a major role in decarbonization efforts.

Our Vision - Mission

Vision: To be the leader in providing innovative and value-added technology, engineering and construction solutions to customers while creating superior shareholder value.

Mission:

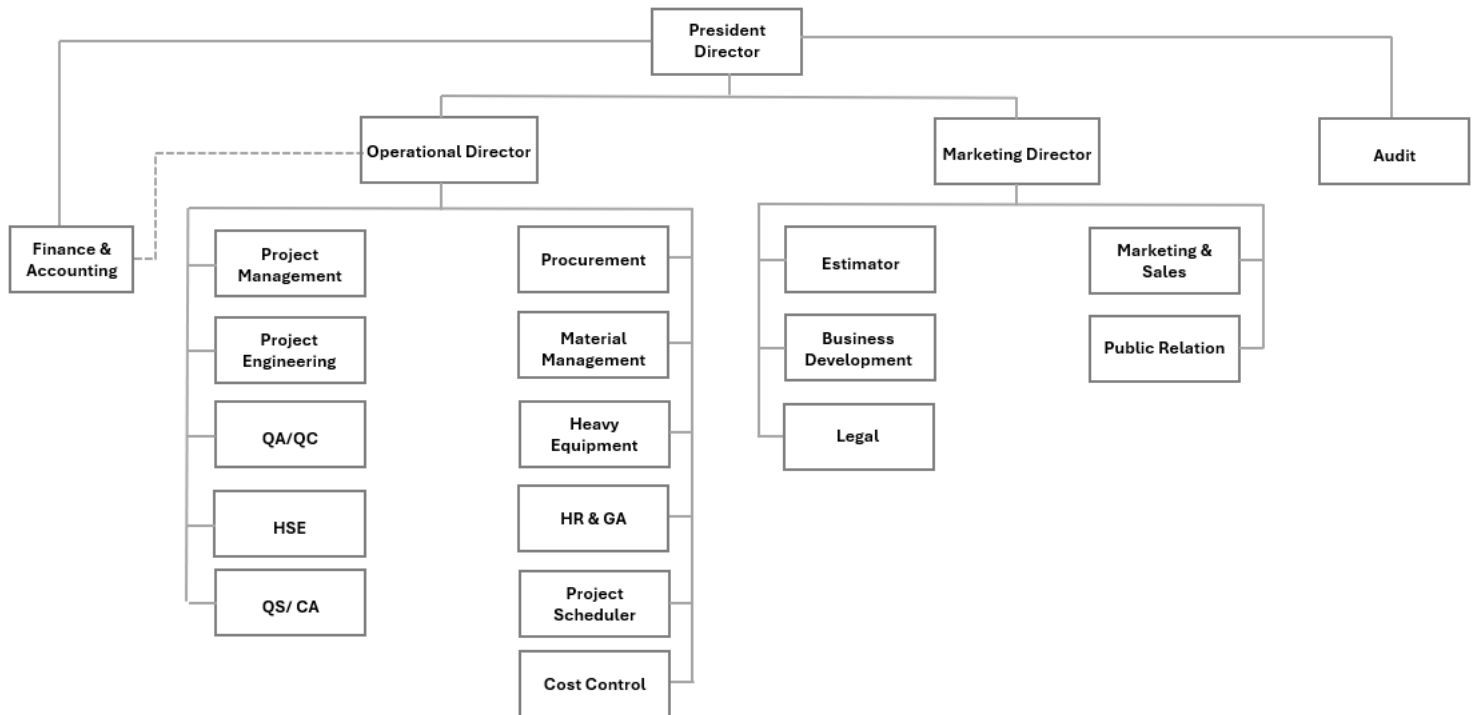

1. Our Construction Company proudly serves our customers and the community with the highest level of quality and integrity in all our projects. We are dedicated to developing and maintaining long-term relationships with our clients by providing comprehensive consultation, comprehensive project management and completing construction jobs in a timely and cost-effective manner. We employ and partner with an experienced and motivated team who focus on superb job performance, unmatched quality and continuous improvement.

2. Our Construction Company is dedicated to always delivering excellent experiences that exceed expectations. We are committed to our customers' success by providing timely and cost-effective services, while reserving our environment and adhering to the highest standards of safety and quality. We strive to meet our customers' needs with creative solutions and pride ourselves in providing exceptional service and support.

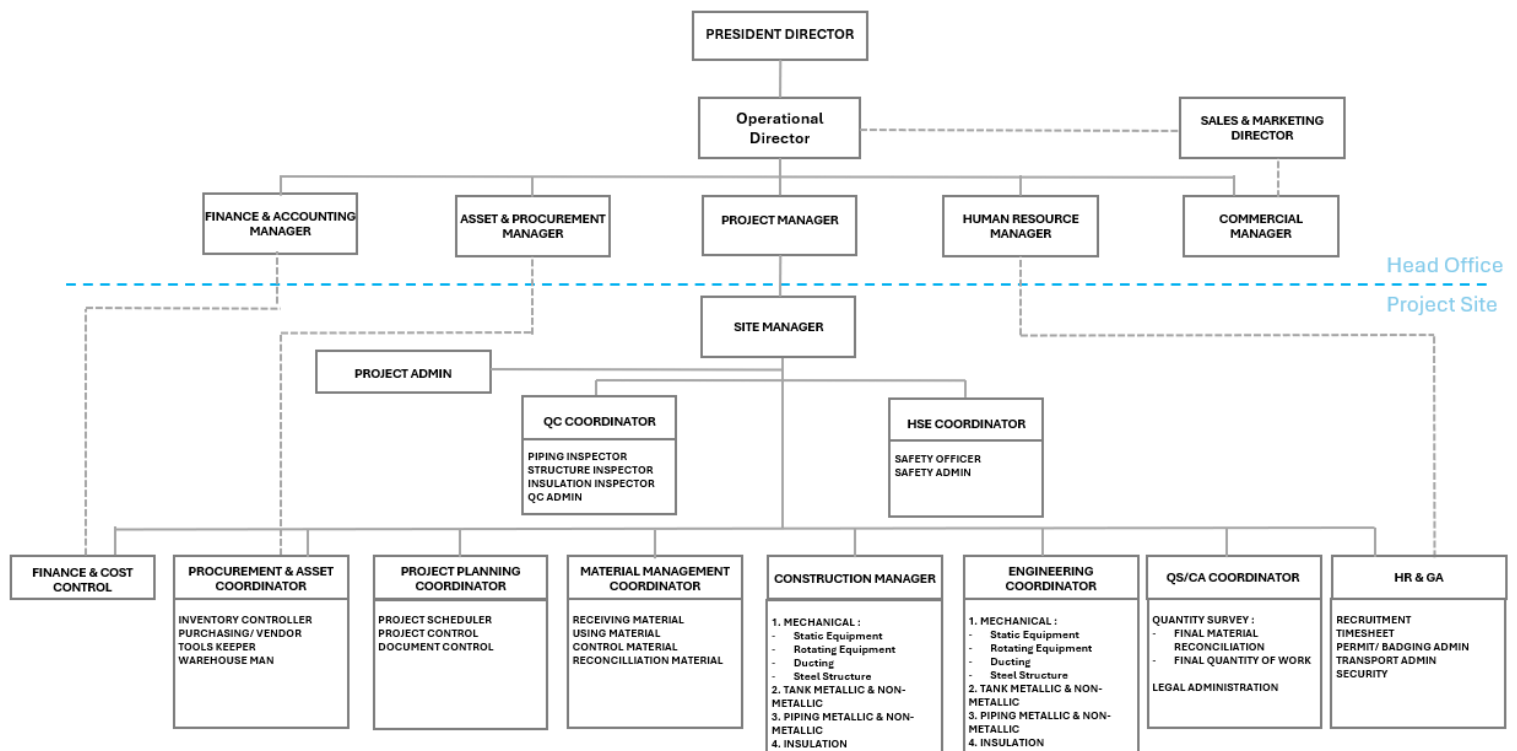

3. Our Company is to bring the highest level of professionalism, client satisfaction, and top-tier construction services to all of our clients. We are dedicated to providing the most innovative and efficient construction solutions.

Corporate Value

We appreciate creative talent

Creative talent is the key driving force that will speed up and guide change.

We guarantee accountability

We are consistent, transparent and responsible in our commitments. Relationships built on trust are our most precious asset.

We take care of our people and the planet

We operate in difficult and at times extreme situations, but we always focus on the health and safety of our people and the preservation of the natural ecosystem.

We support different cultural identities and encourage inclusivity

We support diversity and inclusivity, as only an equal, heterogeneous environment can facilitate the development of new solutions.

In pursuit of the mission, Amertec as lawful and innovative organization will adhere to:

- Highest standard of ethics and professional integrity.
- A safe and healthy environment.
- Commitment to the utmost customer satisfaction.
- Recognition of human capital and its development as valuable asset.
- Stimulating work environment with motivation, effective communication and leadership covenant.
- Continuous quality improvement and sustainability as a way of life.

Our Future Steps

We have always focused on technological innovation and are committed to working alongside our clients on their path to energy transition with increasingly digitalized, well-developed resources, technologies and processes, specifically designed for environmental sustainability.

Innovation is essential for our success: it enables us to constantly improve our competitive position in the O&G business and to cross the new frontiers of energy and industrial decarbonization.

We are engineers for a sustainable future; thus, innovation plays a key role: it enables us to seize new opportunities, develop new technologies, and reduce the environmental impact of our services.

Our Safety Commitment

Amertec committed to Health, Safety and Environment. All the activities of the company will be managed consistently, friendly work environment as safe and secure for all workers and the environment. With the following:

1. Comply with safety, health and the environment law and other regulations prescribed by the government, companies and International.
2. Continuously observing, monitoring and performance improvement health, safety, and environmental (HSE), in all departments.
3. Ensuring and control of hazard identification system, and proactively prevent workplace accidents, occupational diseases, asset damage and environmental pollution.
4. Educate, train, and develop the capacity of all employees, contractors and all concerned on performance, expectations and standards of health, safety, and environmental (HSE)
5. Reviewing policies regularly to ensure health, safety, and environmental (HSE) updating.

Our Services

Our Services

Material Supply

Amertec team works closely with reliable local and global suppliers as well as the entire supply chain industry. We seek to ensure on-time delivery and efficiency by effectively acquiring competitively priced items as its best quality that conforms to our client's requirements. We create a beneficial situation for both ourselves and suppliers to have a smooth and timely day to day operational procurement process through some of these steps:

- Identify and understand client's requirements
- Thoroughly looking for potential suppliers through a supplier
- assessment process
- Sourcing the finest goods and services
- Selecting top level suppliers through a fair bidding stage
- Negotiating agreements that would satisfy both parties
- Building a sustainable
- relationship with suppliers
- while strictly following our code of conduct
